## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 and 11-21 are rejected under 35 U.S.C. 102(b) as being anticipated by ***Chowdhury et al (US Patent 4,572,105)***. Chowdhury et al teach a backflushing system for milking machinery which is structurally similar to the Applicant's claimed in milking device. More specifically, the apparatus includes a milk transporting member having at least one teatcup. A gas conduit for the introduction of a gas (air) into the milk transporting member during the milking state. The gas conduit includes a gas inlet member and a second end which is connectable to a relatively low pressure. In regards to claims 2, 3 and 17, the gas inlet member includes an opening which communicates with a relatively high pressure, such as the environment. As for claim 6, the vacuum pump is connected to the milk collecting member via a vacuum conduit. Regarding claims 7 and 8, the device includes a cleaning device arranged to deliver a cleaning fluid to the teatcup. In regards to claim 14, the milk transporting member includes a claw.

### ***Allowable Subject Matter***

Claims 10 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
